IADT Mission and Objectives

Mission

The International Association of Dental Traumatology (IADT) is a non-profit, public benefit professional organization whose mission is to promote optimal prevention, research, and treatment service in the field of traumatic dental injuries through interaction with dental and medical colleagues, the public, and interested parties in education, sports, industry and appropriate governmental agencies.

Objectives

In order to fulfill the Mission of the IADT, the following objectives are adopted:

- To promote research, both clinical and experimental, in dental traumatology.
- To stimulate development of educational curricula to enhance competency of dental graduates in managing dental injuries.
- To encourage incorporation of educational standards for advanced dental education programs to achieve proficiency in managing dental injuries.
- To promote public awareness of prevention and management of traumatic dental injuries.
- To develop and publish recommended guidelines for treatment of traumatic dental injuries based on current best evidence.
- To assist public health agencies in developing and implementing strategies for prevention and management of dental injuries.
- To represent the interests of dental traumatology in various dental forums.
- To maintain an organizational structure that promotes awareness of dental traumatology.

Report from the Executive Director of IADT

The IADT is truly becoming an international association. As of the writing of this report we have members in 46 countries (see below). And as more and more colleagues learn about the role of the IADT in promoting the latest and best diagnosis and treatment approaches through attendance in courses and visiting our website (<http://www.iadt-dentaltrauma.org>) more new members are recruited. The website continues to be an increasing resource of valuable information both for member and other dentists and patients. The guidelines for management of traumatic dental injuries, which is available free to anyone, is an important service provided by the Association.

Current Countries with IADT members: Argentina, Australia, Austria, Belgium, Brazil, Canada, Chile, Columbia, Croatia, Cyprus, Denmark, Ecuador, El Salvador, Finland, France, Germany, Honduras, Iceland, Iran, India, Israel, Italy, Japan, Kuwait, Mexico, Netherlands, New Zealand, Norway, Papua New Guinea, Paraguay, Philippines, Poland, Portugal, Russia, Singapore, Slovenia, Spain, Spain, Sweden, Switzerland, Taiwan, Thailand, Turkey, United Arab Republic, United Kingdom, Uruguay, USA.

Many IADT members attended the 15th World Congress on Dental Trauma in Nagoya, Japan in January of this year. The question that frequently came up was – where and when will the next congress be held? We had initially considered the possibility of holding it in Edinburgh, Scotland. But it was not feasible to arrange to hold a meeting there during the time in which we were interested. Fortunately, the IADT members in Italy were willing to take on the task of planning a meeting. Please make note of the place and date for the 16th WorldCongress on Dental Trauma:

Verona, Italy
June 11-12, 2010

The congress committee consists of Dr. Elisabetta Cotti, Dr. Piero Alessandro Marcoli, and Dr. Giacomo Cavalleri. They will be aided by a number of capable colleagues; more specific information about the Congress will be forthcoming.

Readers who are interested in joining the IADT can do so through the website (see above) or send an inquiry to: lbakland@llu.edu.

Leif K. Bakland

Executive Director

IADT FINANCIAL REPORT 2007

**Int'l Association of Dental Traumatology
