Dent Traumatol. 2020; 36: 343-359. doi:[10.1111/edt.12576](https://doi.org/10.1111/edt.12576)

3. Dental Trauma Guide (www.dentaltraumaguide.org)
4. Glossary of Trauma terms. Available from the Dental Trauma Guide under the Vocabulary heading in the Task Bar

The candidate for admission to Fellowship of the IADT should fulfill the following objectives:

Epidemiology of traumatic dental injuries (TDI)

1. Understand trauma incidence and prevalence in the primary and permanent dentition
2. Be able to state the typical causes of trauma

Glendor U. Epidemiology of traumatic dental injuries – a 12-year review of the literature. *Dent Traumatol*, 2008; 24: 603-611. doi:[10.1111/j.1600-9657.2008.00696.x](https://doi.org/10.1111/j.1600-9657.2008.00696.x)

Glendor U. Aetiology and risk factors related to traumatic dental injuries – a review of the literature. *Dent Traumatol*, 2009; 25: 19-31. doi:[10.1111/j.1600-9657.2008.00694.x](https://doi.org/10.1111/j.1600-9657.2008.00694.x)

Lauridsen, E., Hermann, N.V., Gerds, T.A., Kreiborg, S. and Andreasen, J.O., Pattern of traumatic dental injuries in the permanent dentition among children, adolescents, and adults. *Dent Traumatol*, 2012; 28: 358-363. doi:[10.1111/j.1600-9657.2012.01133.x](https://doi.org/10.1111/j.1600-9657.2012.01133.x)

Petti S, Glendor U, Andersson L. World traumatic dental injury prevalence and incidence, a meta-analysis—One billion living people have had traumatic dental injuries. *Dent Traumatol*. 2018; 34: 71– 86. <https://doi.org/10.1111/edt.12389>

Examination of a traumatized patient

1. Understand the information that is required before examining a patient
2. Understand the clinical and radiographic information that is required in order to reach the correct diagnosis after a traumatic injury
3. Understand the limitations of pulp sensibility testing in the traumatized dentition
4. Understand what other imaging is available for assessing the traumatized dentition and when this should be used
5. Understand the special considerations in the examination of children
6. Understand the signs of possible child abuse

Myers, GL. Evaluation and diagnosis of the traumatized dentition. *Dent Traumatol*. 2019; 35: 302– 308. <https://doi.org/10.1111/edt.12498>

Andreasen, F.M. and Kahler, B. Diagnosis of acute dental trauma: the importance of standardized documentation: a review. *Dent Traumatol*. 2015; 31: 340-349. doi:[10.1111/edt.12187](https://doi.org/10.1111/edt.12187)

Cohenca, N, Silberman, A. Contemporary imaging for the diagnosis and treatment of traumatic dental injuries: A review. *Dent Traumatol*. 2017; 33: 321– 328. <https://doi.org/10.1111/edt.12339>

Bastos, J.V., Goulart, E.M.A. and de Souza Côrtes, M.I. Pulpal response to sensibility tests after traumatic dental injuries in permanent teeth. *Dent Traumatol*, 2014; 30: 188-192. doi:[10.1111/edt.12074](https://doi.org/10.1111/edt.12074)

Ghouth, N, Duggal, MS, BaniHani, A, Nazzal, H. The diagnostic accuracy of laser Doppler flowmetry in assessing pulp blood flow in permanent teeth: A systematic review. *Dent Traumatol*. 2018; 34: 311– 319. <https://doi.org/10.1111/edt.12424>

Holan, G. Pulp aspects of traumatic dental injuries in primary incisors: Dark coronal discoloration. *Dent Traumatol.* 2019; 35: 309– 311. <https://doi.org/10.1111/edt.12483>

Cavalcanti, A.L. (2010), Prevalence and characteristics of injuries to the head and orofacial region in physically abused children and adolescents – a retrospective study in a city of the Northeast of Brazil. *Dental Traumatology*, 26: 149-153. doi:[10.1111/j.1600-9657.2009.00859.x](https://doi.org/10.1111/j.1600-9657.2009.00859.x)

Classification of TDI

1. Be able to define the following injury types: enamel infraction, enamel fracture, enamel-dentin fracture, enamel-dentin-pulp fracture (complicated crown fracture), crown-root fracture with or without involvement of the pulp, root fracture, fracture of the alveolar process, concussion, subluxation, extrusion, lateral luxation, intrusion, avulsion.

Feliciano, K.M.P.d.C. and Caldas, A.d.F., Jr (2006), A systematic review of the diagnostic classifications of traumatic dental injuries. *Dental Traumatology*, 22: 71-76. doi:[10.1111/j.1600-9657.2006.00342.x](https://doi.org/10.1111/j.1600-9657.2006.00342.x)

Acute treatment of TDI

1. Understand the recommended treatment of TDI in the primary dentition according to the latest version of the IADT guidelines and account for special considerations in the treatment of minor children
2. Understand the recommended treatment of TDI in the permanent dentition according to the latest version of the IADT guidelines
3. Be able to recommend treatment priority (acute, sub-acute, delayed) for the various types of injury
4. Be able to design a suitable follow-up program (review regime) for each different type of injury
5. Understand treatment priorities when planning treatment for the acutely traumatized dentition

Flores, M.T. Traumatic injuries in the primary dentition. *Dent Traumatol*, 2002; 18: 287-298. doi:[10.1034/j.1600-9657.2002.00153.x](https://doi.org/10.1034/j.1600-9657.2002.00153.x)

Needleman, H.L. The art and science of managing traumatic injuries to primary teeth. *Dent Traumatol*, 2011;27: 295-299. doi:[10.1111/j.1600-9657.2011.01005.x](https://doi.org/10.1111/j.1600-9657.2011.01005.x)

Lauridsen, E, Blanche, P, Yousaf, N, Andreasen, JO. The risk of healing complications in primary teeth with intrusive luxation: A retrospective cohort study. *Dent Traumatol*. 2017; 33: 329– 336. <https://doi.org/10.1111/edt.12341>

Lauridsen, E, Blanche, P, Yousaf, N, Andreasen, JO. The risk of healing complications in primary teeth with extrusive or lateral luxation—A retrospective cohort study. *Dent Traumatol*. 2017; 33: 307– 316. <https://doi.org/10.1111/edt.12340>

Andreasen, J.O., Borum, M.K., Jacobsen, H.L. and Andreasen, F.M. (1995), Replantation of 400 avulsed permanent incisors. 2. Factors related to pulpal healing. *Dental Traumatology*, 11: 59-68. doi:[10.1111/j.1600-9657.1995.tb00462.x](https://doi.org/10.1111/j.1600-9657.1995.tb00462.x)

Andreasen, J.O., Borum, M.K. and Andreasen, F.M. (1995), Replantation of 400 avulsed permanent incisors. 3. Factors related to root growth. *Dental Traumatology*, 11: 69-75. doi:[10.1111/j.1600-9657.1995.tb00463.x](https://doi.org/10.1111/j.1600-9657.1995.tb00463.x)

Lauridsen, E, Andreasen, JO, Bouaziz, O, Andersson, L. Risk of ankylosis of 400 avulsed and replanted human teeth in relation to length of dry storage: A re-evaluation of a long-term clinical study. *Dent Traumatol.* 2020; 36: 108– 116. <https://doi.org/10.1111/edt.12520>

Lauridsen, E., Gerds, T. and Ove Andreasen, J. (2016), Alveolar process fractures in the permanent dentition. Part 2. The risk of healing complications in teeth involved in an alveolar process fracture. *Dent Traumatol*, 32: 128-139. doi:[10.1111/edt.12229](https://doi.org/10.1111/edt.12229)

Andreasen, J.O. and Lauridsen, E. (2015), Alveolar process fractures in the permanent dentition. Part 1. Etiology and clinical characteristics. A retrospective analysis of 299 cases involving 815 teeth. *Dent Traumatol*, 31: 442-447. doi:[10.1111/edt.12221](https://doi.org/10.1111/edt.12221)

Soft tissue injuries

1. Understand various types of soft tissue injuries (contusion, abrasion and laceration (superficial or penetrating))
2. Understand suitable treatment for these injuries
3. Be able to describe the indication for antibiotic treatment for soft tissue injuries

Soares, T.R.C., Barbosa, A.C.U., de Oliveira, S.N.S., Oliveira, E.M., Risso, P.d.A. and Maia, L.C. (2016), Prevalence of soft tissue injuries in pediatric patients and its relationship with the quest for treatment. *Dent Traumatol*, 32: 48-51. doi:[10.1111/edt.12216](https://doi.org/10.1111/edt.12216)

Pathophysiology and consequences of dental trauma

1. Understand healing events after traumatic injuries to the pulp
2. Understand healing events after traumatic injuries to the periodontium
3. Understand the following dental healing complications: pulp canal obliteration, pulp necrosis, repair-related resorption (surface resorption), infection-related resorption (inflammatory resorption), ankylosis-related resorption, marginal breakdown of bone (transient and permanent)
4. Understand the clinical and radiographic findings in relation to the above mentioned complications
5. Be able to evaluate the risk of healing complications and tooth loss for the various types of TDI

6. Understand the possible sequelae in the permanent dentition after trauma in the primary dentition

Fouad, AF. Microbiological aspects of traumatic injuries. *Dent Traumatol.* 2019; 35: 324– 332. <https://doi.org/10.1111/edt.12494>

Holan, G. (2013), Replantation of avulsed primary incisors: a critical review of a controversial treatment. *Dent Traumatol*, 29: 178-184. doi:[10.1111/edt.12038](https://doi.org/10.1111/edt.12038)

Flores, MT, Onetto, JE. How does orofacial trauma in children affect the developing dentition? Long-term treatment and associated complications. *Dent Traumatol.* 2019; 35: 312– 323. <https://doi.org/10.1111/edt.12496>

Lenzi, M.M., Alexandria, A.K., Ferreira, D.M.T.P. and Maia, L.C. (2015), Does trauma in the primary dentition cause sequelae in permanent successors? A systematic review. *Dent Traumatol*, 31: 79-88. doi:[10.1111/edt.12149](https://doi.org/10.1111/edt.12149)

Tewari, N, Mathur, VP, Singh, N, Singh, S, Pandey, RK. Long-term effects of traumatic dental injuries of primary dentition on permanent successors: A retrospective study of 596 teeth. *Dent Traumatol*. 2018; 34: 129– 134. <https://doi.org/10.1111/edt.12391>

Predictors for healing complications

1. Understand the most important predictors for pulp necrosis and root resorption

Endodontic considerations

1. Understand the treatment of infection related resorption
2. Understand the treatment and discuss possible challenges in the treatment of pulp necrosis in teeth with immature root development and in root fractured teeth

Barnett, F. (2002), The role of endodontics in the treatment of luxated permanent teeth. *Dental Traumatology*, 18: 47-56. doi:[10.1034/j.1600-9657.2002.00098.x](https://doi.org/10.1034/j.1600-9657.2002.00098.x)

Long term consequences of early tooth loss

1. Understand the mechanism for infra-occlusion of ankylosed teeth in adolescents
2. Understand the treatments available for treating the submerging tooth.

Malmgren, B., Tsilingaridis, G. and Malmgren, O. (2015), Long-term follow up of 103 ankylosed permanent incisors surgically treated with decoronation – a retrospective cohort study. *Dent Traumatol*, 31: 184-189. doi:[10.1111/edt.12166](https://doi.org/10.1111/edt.12166)

Mohadeb, J.V.N., Somar, M. and He, H. (2016), Effectiveness of decoronation technique in the treatment of ankylosis: A systematic review. *Dent Traumatol*, 32: 255-263.

Information to the public

1. Be able to recommend appropriate emergency measures to be taken immediately following dental trauma

Kenny, KP, Day, PF, Sharif, MO, et al. What are the important outcomes in traumatic dental injuries? An international approach to the development of a core outcome set. *Dent Traumatol.* 2017; 00: 1– 11. <https://doi.org/10.1111/edt.12367>

Prevention of TDI

1. Be able to identify high risk sports
2. Understand measures (e.g. mouth guards) that can be used to prevent these injuries

Sigurdsson A. Evidence-based review of prevention of dental injuries. *J Endod.* 2013 Mar;39(3 Suppl):S88-93. doi: 10.1016/j.joen.2012.11.035.
